

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
AMERICAN NATURALIST,
AN ILLUSTRATED MAGAZINE
OF
NATURAL HISTORY.

EDITED BY
A. S. PACKARD, JR., AND EDWARD D. COPE.

ASSOCIATE EDITORS :
PROF. C. E. BESSEY, DEPARTMENT OF BOTANY.
PROF. C. V. RILEY, DEPARTMENT OF ENTOMOLOGY.
PROF. O. T. MASON, DEPARTMENT OF ANTHROPOLOGY.
PROF. H. CARVILL LEWIS, DEPARTMENT OF MINERALOGY.
ELLIS H. YARNALL, DEP. OF GEOGRAPHY AND TRAVELS.
DR. R. H. WARD, DEPARTMENT OF MICROSCOPY.

VOLUME XVI

PHILADELPHIA :
PRESS OF McALLA & STAVELY,
Nos. 237 AND 239 DOCK STREET.
1882.

Copyrighted 1882.
BY MCCALLA & STAVELY,
For the Proprietors.

CONTENTS.

The Blind Cave Fishes and their Allies	<i>S. A. Forbes</i>	1
A Singular Parasitic Isopod Crustacean and some of its Developmental Stages	<i>Carl F. Gissler</i>	6
The Heterogony of <i>Oxalis violacea</i>	<i>William Trelease</i>	13
Forests—Their Influence upon Climate and Rainfall.	<i>J. M. Anders</i>	19
Glacial Marks in Labrador.	<i>A. S. Packard, Jr.</i>	30
The Siphonophores. (IV. — Anatomy and Development of Diphyes.)	<i>J. Walter Fewkes</i>	89
Remarks on the Cretaceous and Tertiary Flora of the Western Territories.	<i>Leo Lesquereux</i>	102
Structure and Ovarian Incubation of <i>Gambusia patruelis</i> , a Top-Mimow	<i>John A. Ryder</i>	109
Note on a few of the Useful Plants of Northern Japan.	<i>D. P. Penhallow</i>	119
Habits of Butterflies	<i>W. H. Edwards</i>	122
The Tertiary Formations of the Central Region of the United States	<i>E. D. Cope</i>	177
A Pathogenic Schizophyte of the Hog	<i>H. J. Detmers</i>	195, 293
On Certain Aboriginal Implements from Napa county, California	<i>Robert E. C. Stearns</i>	203
Barbados	<i>F. M. Endlich</i>	210
Courtship and Marriage among the Choctaws of Mississippi	<i>H. C. Halbert</i>	222
Mound Pipes	<i>Edwin A. Barber</i>	265
On the Flowers of <i>Solanum rostratum</i> and <i>Cassia chamaecrista</i>	<i>J. E. Todd</i>	281
Is <i>Limulus</i> an Arachnid?	<i>A. S. Packard, Jr.</i>	287
Mexican Caves with Human Remains	<i>Edward Palmer</i>	306
The Acorn-storing Habit of the California Woodpecker	<i>Robert E. C. Stearns</i>	353
Observations on some American forms of <i>Clara coronata</i>	<i>T. F. Allen</i>	358
The Loess of North America.	<i>R. Ellsworth Coll.</i>	369
Ichthyological Papers by George Powers Dunbar, with a sketch of his Life.	<i>Jacob L. Wortman</i>	381
Problems for Zoologists.	<i>J. F. Kingsley</i>	389
Transformations of <i>Planorbis</i> at Steinheim, with Remarks on the Effects of Gravity upon the forms of Shells and Animals.	<i>Alpheus Hyatt</i>	441
On Archæsthetism.	<i>E. D. Cope</i>	454
Organic Physics.	<i>Charles Morris</i>	470, 549, 650
The Order of the Universe.	<i>W. N. Lockington</i>	484
On Some Entomostraca of Lake Michigan and Adjacent Waters.	<i>S. A. Forbes</i>	537, 640
Notes on the Habits of some Western Snakes.	<i>H. A. Brous</i>	564
The Limit of the Innuited Tribes on the Alaska coast	<i>Ivan Petroff</i>	567
On the Compass Plant.	<i>Benjamin Alvoird</i>	625
The Development of the Tree-toad	<i>Mary H. Hinckley</i>	636
Methods of Microscopical Research in the Zoological Station in Naples	<i>C. O. Whitman</i>	697, 772
Notes on the Habits of the "Savannah Cricket Frog."	<i>Charles S. Abbott</i>	707
The Evolution of Forms from the Clinton to the Niagara Group	<i>Eugene N. S. Ringuenberg</i>	711
Hypnotism in Animals.	<i>D. W. Prentiss</i>	715
Sketch of the Progress of North American Ichthyology in the Years 1880-1881.	<i>W. N. Lockington</i>	765
On the Homologies of the Crustacean Limb.	<i>A. S. Packard, Jr.</i>	785
Idols and Idol Worship of the Delaware Indians	<i>Charles C. Abbott</i>	799
The Ancient Man of Calaveras.	<i>W. O. Ayres</i>	845
The Gray Rabbit (<i>Lepus sylvaticus</i>)	<i>Samuel Lockwood</i>	854, 937
The Crustacean Nebalia and its Fossil Allies, representing the order Phyllocarida.	<i>A. S. Packard, Jr.</i>	861
American Work on Recent Mollusca in 1881.	<i>William H. Dall</i>	874, 953

Progress of Invertebrate Palæontology in the United States for the year 1881	<i>C. A. White</i>	887
The Number of Bones at present known in the Pectoral and Pelvic Limbs of Birds.	<i>R. W. Shufeldt</i>	892
A Pilgrimage to Teotihuacan.	<i>R. E. Hills</i>	933
The Palæozoic Allies of <i>Nebalia</i>	<i>A. S. Packard, Jr.</i>	945
The Organic Compounds in their Relations to Life.	<i>Lester F. Ward</i>	968
The Reptiles of the American Eocene	<i>E. D. Cope</i>	979

EDITORS' TABLE.

Legal Insanity, 33; Science and Art, 123; Lewis H. Morgan, 124; Tariff on specimens and apparatus, 125; The Philadelphia Academy, 125; Spitzka's Evidence, 125; The Equivalents of Consciousness, 224; Effort and Use in Evolution, 311; Charles R. Darwin, 487; Sexual Selection in Man, 490; Tax on Books coming through the Foreign Mails, 576; The Philadelphia Academy of Natural Sciences, 663; Projects for commemorating men of science, 803; Guiteau's Brain, 895; Arctic Exploration, 896; The British Association in 1884, 896; The Gardener's Monthly, 896; The Calaveras Skull, 896; Women in Universities, 996; Government of Universities, 995; The Calaveras Skull, 897, 995; Admission of Women to our Universities, 994; Administration of Universities, 995.

RECENT LITERATURE.

Mivart's *The Cat*, 35; Thomas' Fifth Report on the Injurious Insects of Illinois, 39; Walcott on the Organization of Trilobites, 40; Recent Books and Pamphlets, 41; Murphy's *Habit and Intelligence*, 125; Southall's *Pliocene Man in America*, 128; Miss Ormerod's *Manual of Injurious Insects*, 129; Recent Books and Pamphlets, 130; Balfour's *Comparative Embryology*, 227; Gill's *Recent Progress in Zoology* for the years 1879 and 1880, 229; Thorell's *Spiders of Malaysia and Papua*, 230; The Distribution of North American Fresh-water Mollusca, 231; Zittel's *Handbuch der Palæontologie*, 232; Martin and Moale's *How to Dissect a Chelonian*, 232; Packard's *Zoology*, third edition, 232; Verrill's *Cephalopods of the Northeastern coast of America*, 233; Recent Books and Pamphlets, 233; The Development of *Amphioxus* by Hatschek, 313; Trouessart's *Catalogue of Recent and Fossil Mammals*, 314; Bettany's *Practical Botany*, 315; Balfour's *Comparative Embryology* (second notice), 315; Elliott's *Seal islands of Alaska*, 317; Recent Books and Pamphlets, 318; The *Zoological Record* for 1880, 391; The *Fish Fauna of Borneo*, 391; Mark's *Maturation, Fecundation and Segmentation of Limax*, 392; Gentry's *Nests and Eggs*, 392; Recent Books and Pamphlets, 393; Volcanoes, 492; Brunton's *Bible and Science*, 496; Chautauqua Text Books, No. 22, *Biblical Biology*, 498; Darwin's *Formation of Vegetable Mold through the action of Worms*, 499; The *Microscope in Medicine*, by Lionel S. Beale, M.B., F.R.S., 500; Recent Books and Pamphlets, 504; Knowledge, 577; *Animal Analysis*, 578; *Biologisches Centralblatt*, 578; Pagenstecher's *General Zoology*, 4th Part, 579; Brooks' *Invertebrate Zoology*, 579; Hartman on *Partula*, 580; Recent Books and Pamphlets, 582; Nordenskiöld's *Voyage of the Vega*, 664; Huxley's *The Crayfish*, 666; Recent Books and Pamphlets, 671; Oustalet's *Monograph of the Megapodiidae*, 727; Donnelly's *Atlantis*, 729; Underwood's *Ferns*, 731; Studies from the Biological Laboratory of Johns Hopkins University, 731; Recent Books and Pamphlets, 732; Lubbock's *Ants, Bees and Wasps*, 804; Lütken's *Zoology*, 808; Grote's *Illustrated Essay on the Noctuidæ of North America*, 808; Recent Books and Pamphlets, 808; Hough's *Elements of Forestry*, 897; Scudder's *Nomenclator Zoologicus*, 898; *Revue des Travaux Scientifiques*, 886; Hovey's *Celebrated American Caves*, 899; Recent Books and Pamphlets, 900; Lankester on *Degeneration*, 996; Geikie's *Geological Sketches*, 997; Treat's *Injurious Insects of the Farm and Garden*, 998; Geikie's *Physical Geography*, 999; U. S. Fish Commission Report for 1879, 1000; Recent Books and Pamphlets, 1000.

GENERAL NOTES.

Botany.—Mimicry in Fungi, 42; *Simblum rubescens* Gerard, in Iowa, 42; The *Asparagus Stem* for Laboratory Study, 43; The Abundance of Fresh-water Algae, 43; The Systematic Arrangement of the Thallophytes, 43; Electric Light and Plant Growth, 46; Botanical Notes, 47; An Instance of the Physiological Value of Trichomes, 132; The Arrangement of Fibrous Roots, 132; The Royal Gardens at Kew, 133; A General Index to the Journal of Botany, 134; Bentham on Gramineæ, 134; Botanical Notes, 134; *Gordonia pubescens* L'Her (Franklinia altamaha Marshall), 235; *Diatrype disciformis* (Hoff) Fr., 238; Botanical Notes, 240; Motility in the Flowers of *Draba verna*, 320; New Work on the Fungi, 320; De Thumen's *Mycotheca universalis*, 321; Notes on N. American Grasses, based on Mr. Bentham's recent paper on Gramineæ, 321; Botanical Notes, 322; The Study of Lichens in North America, 394; On the terms Annual and Biennial, 396; A Botanist's trip to "The Arrostook," No. 2, 397; Botanical Notes, 399; The Quill-

worts of North America, 506; Modern Botany and Mr. Darwin, 507; Botanical Notes, 508; An Active Desmid, 584; The Coffee-leaf Fungus one of the Uredineæ, 584; Popularizing Cryptogamic Botany, 586; Abnormal Spathes of Symplocarpus, 587; Ellis' North American Fungi, 588; Note on Uredineæ, 671; Allen's Characeæ Americanæ Exsiccatae, 672; Colored Figures of the larger Fungi, 673; The Scarcity of Alder Catkins, 673; Botanical Notes, 673; Notes on Mistle-toes, 732; Differences in Radial Thickness in Tree Trunks, 735; A climbing Polypodium, 736; Some new species of Sphæriaceous Fungi, 809; New Fungi by J. B. Ellis, 810; Pacific Coast Botany, 811; Gray's "Contributions to North American Botany," 812; A Botanical Excursion to Mt. Mansfield and Smuggler's Notch, 901; Botanical Notes, 906; New Species of North American Fungi, 1001; Cut-leaved Beech, 1004; Agency of Water in Forest Destruction, 1004; On the Heterocism of the Uredineæ, 1005; Note on Gerardia, 1005.

Zoology.—Observations on the species of Planarians parasitic on *Limulus*, 48; The Circulation of Sessile-eyed Crustacea, 51; Viviparous Chirodota, 51; A marine Planarian and its Habitation, 52; Eye of Planarians, 53; The Structure and Affinities of the Hippopotamus, 53; *Verrillia blakei* or *Halipetris blakei*, 55; Discoveries of the U. S. Fish Commission on the southern coast of New England, 56; Does the Crow Blackbird eat Crayfish? 57; Wild birds racing with the Cars, 58; Infusoria in Dew, 59; Zoological Notes, 59; Is the Human Skull becoming Thinner? 136; Habits of the Fierasfer, a boarder in the Sea-cucumber, 137; Habits of the *Menopoma*, 139; The Sparrow pest in Australia, 140; Occurrence of the Opossum in Central New York, 141; The claw on the "index" finger of the Cathartidæ, 141; A new Distomum Parasite in the egg-sacks of *Apus*, 142; Additional note on the egg cases of Planarians ectoparasitic on *Limulus*, 142; Notes on some fresh-water Crustacea together with descriptions of two new species, 143; Revival of Tardigrades after Desiccation, 146; Variation in *Æquoria forskalea*, 147; Development of the Sterlet, 147; Zoological Notes, 148; Nesting Habits of the Horned Lark, 240; Notes on some fresh-water Crustacea, together with descriptions of two new species, 241; Albinism in a Crustacean, 243; Longevity of the Turtle, 243; Habits of the Boring Sponge, 243; Color Sense in Crustacea, 244; Hairs of the anterior Antennæ of Crustacea, 244; *Bythinia tentaculata*, 244; Zoological Notes, 245; The Cell-parasite of the Frog, 323; Vitality of the Mud Puppy, 325; The first Californian Eel caught, 326; Wild Geese as Pests, 326; Zoological Notes, 326; Note on the Geographical Distribution of certain Mollusks, 400; The European House Sparrow, 402; The Opossum at Elmira, N. Y., 403; A large Octopus on the Florida coast, 403; Japanese Aquatic Animals living on Land, 403; Zones of Life in the Ocean, 405; Steller's Manatee, 406; Zoological Notes, 407; The Nature of Life, 509; Is Man the highest Animal? 511; Zoological Notes, 512; Preliminary Classification of the Brain of Crustacea, 588; The Coloring of Zoo-geographical Maps, 589; Professor E. A. Birge on the first Zœa stage of *Pinnotheres ostreum*, 589; *Bopyroides latreuticola*, a new species of Isopod Crustacean parasitic on a gulf-weed Shrimp, 591; Zoological Notes, 594; The Distribution of *M. margaritifera*, 675; Nomenclature of external parts of Arthropoda, 676; Zoological Notes, 677; The Occurrence of *Mephitis interrupta Rafinesque*, in North Carolina, 736; Note on *Gadinia excentrica Tiberi*, 737; Molluscan Notes, 737; Habits of the Woodcock, 737; Feline Development, 738; Development of the Sturgeon and the Homologies of the Vertebrate Brain, 739; Recent Progress in the Study of Worms, 739; Nervous System in Tape-worms, 740; Simroth's Nervous System and Locomotion of German land and fresh-water Mollusks, 740; Zoology in France, 741; Development of the paired Fins in Sharks and Skates, 741; Mr. Stearns on Variation in American Planorbes, 741; Researches on the Comparative Structure of the Cortex Cerebri, 742; Concluding Observations on the Locomotor System of Medusæ, 743; Ova of *Echidna hystrix*, 744; Zoological Notes, 771; Habits of Fresh-water Crustacea, 813; On the Habits of *Cryptobranchus*, 816; Mammals of New Guinea, 817; Results of the Voyage of the Magenta, 819; The Ink-bag of the Cephalopoda, 820; Zoological Notes, 821; The Bite of the Gila Monster (*Heloderma suspectum*) 907; A land Shell new to the United States, 909; Gavaret on Astigmatism, 939; W. Leche upon the Milk Dentition and Homologies of the Teeth of Cheiroptera, 910; Early Stages of the Clam, 911; Anatomy of the Ophiuridæ, 911; Zoological Notes, 912; A new genus and species of the crustacean family *Lyncodaphnidae*, 1006; Food of the Nestlings of *Turdus migratorius*, 1007; More Complaint about *Passer domesticus*, 1008; A Prolific Garter Snake, 1008; The Spotted Spreading Adder Viviparous, 1008; Habits of the English Sparrow, 1009; The Black-footed Ferret, (*Putorius nigripes*) in Texas, 1009; The Occurrence of *Demodex phylloides Csokor*, in American Swine, 1009; How bad Weather affects the Birds, 1010; Protective Change of Color in a Spider, 1010; The Structure and Development of the Skull in Sturgeons, 1011; The Amylolytic and Proteolytic Activity of Pancreatic Extracts, 1011; The Birds of Heligoland, 1012; Zoological Notes, 1012.

Entomology.—On some curious methods of Chalcid Pupation. 60; On the Oviposition of *Prodoxus decipiens*, 62; Clover Insects, 63; Horn's Classification of the Carabidæ, 63; The Butterfly Trees of Monterey again, 64; Interest felt in economic entomology in California, 65; Obit-

uary, 65; On some curious methods of Pupation among the Chalcididae, 149; New Insects injurious to Agriculture, 151; New Entomological Periodicals, 152; Locust Probabilities for 1882, 153; Entomological Notes, 153; List of North American Cynipidae, 246; Bibliography of Gall Literature, 246; A new Depredator infesting Wheat-stalks, 247; Further notes on the imported Clover-leaf Weevil, 248; Silk-worm Eggs, prices and where obtained, 249; Possible Food-plants for the Cotton-worm, 327; Arrangement of N. A. Cynipidae by Dr. Mayr, 329; Mode of feeding of the larva of *Dytiscus*, 330; Entomological Notes, 330; Carnivorous habits of *Microcentrus retinervus*, 408; Note on the first insect from Wrangell Island, 408; Lichtenstein's theory as to dimorphic asexual Females, 409; Naphthaline cones for the protection of insect collections, 409; Injurious insects in California, 410; *Sarcophaga lineata* destructive to locusts in the Dardanelles, 410; Parasitic Diptera, 411; Dorsal locomotion of *Allorhina nltida*, 411; Modes by which Scale Insects spread from tree to tree, 411; Notes from Illinois, grain-feeding habits of Field Crickets, 513; Habits of *Cybocephalus*, 514; One effect of the Mississippi floods, 514; *Doryphora 10-lineata* in England, 515; Dr. Dimmock's Inaugural Dissertation, 515; The *Triungulin* of *Meloidae*, 515; Fossil Tineids, 515; Classification of North American Coleoptera, 515; Exchanges with South France, 516; Hibernation of the Army-worm, 516; Repelling Insects by Malodorants, 596; Habits of *Bittacus apterus*, 596; Strange Habit of *Metapodius femoratus* Fab., 597; Habits of *Coscinoptera dominicana*, 598; Bot-fly Maggots in a Turtle's Neck, 598; Sun-spots and Insect Life, 598; A Mite infesting a Pork-packing House, 599; Larvæ of a Fly in a hot spring in Colorado, 599; Descent of *Dytiscus* during a shower, 600; Change of Habit, two new enemies of the Egg-plant, 678; Notes on Microgasters, 679; Does Parthenogenesis exist in the Bee? 630; Are Honey-bees Carnivorous? 681; The Honey-bee tasting of Flesh, 681; The "Overflow Bugs" in California, 681; Insects and Drouth, 745; Probable Sound Organs in Spingid Pupæ, 745; Clover Insects, 746; Is *Cyrtoneura* a Parasite or Scavenger, 746; Habits of *Polycæon confertus* Lec., 747; *Dinoderus pilosus* as a Museum Pest, 747; Myrmecophilous Coleoptera, 747; Discontinuance of Publication, 748; Buffalo Tree-hopper injurious to Potatoes, 822; Wood-boring Coleoptera, 823; Bacterium a Parasite of the Chinch bug, 824; On the mouth of the larva of *Chrysopa*, 825; Moths attracted by falling Water, 826; A new museum Pest, 826; Fleas feeding on Lepidopterous larvæ, 826; The Buckeye Leaf-stem Borer, 913; Defoliation of Oak trees by *Dryocampa senatoria* in Perry county, Pa., 914; Efficacy of Chalcid Egg-parasites, 914; On the Biology of *Gonotopus pilosus* Thoms., 915; Species of Otiorhynchidae Injurious to Cultivated Plants, 915; Bombyliid Larvæ Destroying Locust Eggs in Asia Minor, 916; A new Rice Stalk-borer; Genus-grinding, 1014; Effect of Pyrethrum upon the Heart-beat of *Plusia brassicae*, 1015; Entomology in Washington Territory, 1016; The Army-worm in 1882, 1017; The Wheat-stalk worm on the Pacific slope, 1017; Deserved honor, 1018; Important work on Cynipidae, 1018; Remarkable Felting caused by a Beetle, 1018; Location of Taste in Insects, 1019; Vitality of Insects in Gases, 1019.

Anthropology.—Review of recent works on Anthropology, 66; Anthropology in Japan, 70; Snake Superstitions of the Pueblos of New Mexico, 70; Mr. Morgan's last work, 153; The Calendar Stone, 154; Stone Image found in Ohio, 154; The American Antiquarian, 154; Contributions here and there, 155; Recent Popular Works, 155; Anthropology in Great Britain, 156; Professor Rau on Cup-shaped Stones, 250; Mexican Anthropology, 251; The Implements of the Trenton gravels, 252; Antiquities of New Mexico and Arizona, 252; Asiatic Tribes in North America, 252; Anthropology in France, 253; Correction, 153; The Maya-Kiche Gods, 331; The Western Reserve and Northern Ohio Historical Society, 332; Antiquities of Anderson township, Hamilton county, Ohio, 332; The Anthropological Institute of Great Britain, 332; Necrology, 333; Charney on the age of Palanque, 412; Major Powell's first Annual Report, 413; Lubbock's Origin of Civilization, 414; Pre-Indian Aborigines, 415; Were copper axes swedged or cast? 415; Anthropology in France, 415; Dr. Rau's latest contribution to Anthropology, 516; The books of Chilan Balam, 517; The relation of history to Anthropology, 517; Darwin and Anthropology, 518; Anthropology in Germany, 519; Anthropology in Great Britain, 519; A well-merited Honor, 600; A Correction, 600; The Washington Saturday Lectures, 600; Ethnography of the Philippines, 682; The "Revue d'Ethnographie," 683; The Archaeological Institute of America, 683; Cist Graves in Ohio, 684; Special Collections in the new National Museum, 684; Indian Languages of the Pacific States, 749; Geiger's Development of the Human Race, 750; The Smithsonian Report for 1880, 750; Colonel Stevenson's Collections from the Pueblos, 751; Anthropology in Great Britain, 752; Anthropological Notes, 752; British Anthropology, 726; Anthropology in France, 827; Anthropological Nomenclature, 828; The Siouan or Dakota Stock, 829; The National Museum, 829; Anthropology at the American Association, 917; The Anthropological Institute, 1023; Asia, 1024; Anthropology in America, 1026; The American Antiquarian, 1027.

Geology and Palæontology.—The oldest Artiodactyle, 71; The Characters of the Tæniodonta,

72; New forms of Coryphodontidæ, 73; An anthropomorphous Lemur, 73; The Archæan Rocks of Great Britain, 74; A new British Formation, 74; Recent extinction of the Mastodon, 74; The Mesozoic of Virginia, 75; Geological News, 76; A new genus of Tillodontia, 156; A great deposit of Mud and Lava, 157; Invertebrate fossils from the Lake Valley district, New Mexico, 158; Insects of the Amyzon shales of Colorado, 159; The future of Geology, 160; Marsh on the classification of the Dinosaurs, 253; The Dinosaurs of Bernissart, 255; Hulke on *Polocanthus foxi*, 256; Russian Sauropterygia, 256; The Geology of Florida, 256; Geological News, 257; New characters of the Perissodactyla condylarthra, 334; *Mesonyx* and *Oxyæna*, 334; The rachitinous *Stegocephali*, 334; Marsh on the Dinosauria, 335; Geological News, 335; A second genus of Eocene Plagiancladidæ, 416; Two new genera of the Puerco Eocene, 417; "Mud lumps" and mounds near New Orleans, 418; Geological Notes, 420; The ancestry and habits of *Thylacoleo*, 520; Notes on Eocene Mammalia, 522; On the Taxeopoda, a new order of Mammalia, 522; Geological News, 523; Lesquereux on the Tertiary Flora as related to the Tertiary Animals of the West, 602; The Geological and Natural History Survey of Canada, 602; Absence of ancient Glaciers in Eastern Asia, 604; A new genus of Tæniodonta, 604; Geological News, 605; New Marsupials from the Puerco Eocene, 684; Geological News, 686; The Southern Limit of Ancient Glaciers in Pennsylvania, 753; New Phyllopod and Phyllocaridan Crustacea from the Devonian of New York, 754; White's Contributions to Mesozoic and Tertiary Palæontology, 754; Whitfield's new species of Fossils from Ohio, 755; Davis on the Little Mountains east of the Catskills, 755; Geological Notes, 755; Mammalia in the Laramie Formation, 830; A new form of Tæniodonta, 831; The Periptychidæ, 832; Some new forms from the Puerco Eocene, 833; Geological News, 834; Theories of the Origin of the Loess, 920; The Recent Discoveries of Fossil Footprints in Carson, Nevada, 921; Origin and Mode of Formation of Saline Mineral Waters, 923; The so-called Leadville Porphyry, 925; Permian Vertebrata, 925; Geological News, 925; A fossil Croatian Whale (*Mesocetus agrami*), 1027; Origin of the Prairies, 1028; Davis' Classification of Lake Basins, 1028; Collett's Geology of Indiana for 1881, 1028; Two new genera of Mammalia from the Wasatch Eocene, 1029; White's Carboniferous Invertebrate Fossils of New Mexico, 1029; Geological News, 1030.

Mineralogy.—Systematic Mineralogy, 76; Lime crystals in a limekiln, 77; Nitrobarite, 78; Vanadium minerals, 78; Microlite from Virginia, 79; Diadochite, 79; Vivianite, 79; Rosterite, 79; Uranothorite, 79; Beauxite, 79; Bergamaskite, 80; New Bismuth minerals, 80; The optical properties of Pyromorphite and Mimetite, 80; Chalcocite on an old coin, 80; Nova Scotia minerals, 80; Phytocollite, a new mineral from Scranton, Pa., 161; Cossyrite, 162; Alaskaite, 162; Pseudomorphs of copper after Aragonite, 162; Electricity developed by the compression of crystals, 162; Note on Gold, 163; A new text book of mineralogy, 163; Mineralogical News, 164; Helvite from Amelia county, Virginia, 337; A new Manganese mineral, 338; Galena with octahedral cleavage, 338; The condition of sulphur in coal, 338; Spiral figures in crystals, 339; Native silver, 339; Some Virginia minerals, 340; New minerals, 340; Mineralogical Notes, 341; Pseudo-symmetry, 421; Hieratite, a new mineral, 423; Monazite from Virginia, 423; Some supposed new Scottish minerals, 424; Menaccanite, Leucoxite and Titanomorphite, 424; New minerals, 425; Mineralogical Notes, 425; Two new guano minerals, 524; Uranothallite, 525; Chiolite and Chodnoffite, 525; Rhodizite, 526; Crosby's Common Minerals and Rocks, 526; Martite, 826; Smaltite from Colorado, 527; New mineral resins, 527; The Sands of the Desert of Sahara, 527; Mineralogical Notes, 527; Proceedings of the Mineralogical Section of the Phila. Academy of Natural Sciences, 607; A new locality for Hayesine, 610; The third appendix to Dana's Mineralogy, 610; Orthite from Virginia, 611; New Analyses of Columbite and Monazite, 611; Obituary, 611; A Phosphorescent Variety of Limestone, 687; Proceedings of the Mineralogical Society of Great Britain and Ireland, 688; Lernilite and other supposed new German Minerals, 690; Mineralogical Notes, 690; The Manufacture of Artificial Diamonds, 756; Pyrites as a source of Sulphuric Acid, 756; A dimorphous form of Tin, 757; Blasting with Lime, 757; The Formation of Sulphur in the Soil of Paris, 757; Mineralogical Notes, 758; Chrome Tourmaline, 835; Paraffine in Lava, 835; New Localities, 835; A relation between the optical and chemical properties of Pyroxene and Amphibole, 836; New Minerals, 836; Diabantite-vermiculite, 836; Salt water in Sulphur Crystals, 837; The dispersion of Chromate of Soda, 837; Aluminium as a blow-pipe support, 837; Ersbyite, 838; Mineralogical Notes, 838; The action of Heat upon Crystals of Boracite, 926; Prehnite, 926; American Monazites, 927; Minerals from Pike's Peak, 928; Mineralogical Notes, 928; Some new minerals in Meteorites, 1031; Corundum and its Alterations, 1032; The Paragenesis of Minerals, 1033; A mountain of Martite, 1034; Analyses of Helvite, 1034.

Geography and Travels.—M. deBrazza's Journey from the Ogowe to the Congo, 80; Central Africa, 81; Arctic Discovery, 83; International Polar Conference, 83; Geographical News, 84; The Jeannette and the Search Expeditions, 165; Arctic Exploration, 167; Geographical

Notes, 168; Dr. Lenz on the Sahara, 258; Arctic Exploration, 259; Explorations in Equatorial Africa, 341; The Caroline Archipelago 426; The Pamir, 427; Alaska, 427; Polar Stations, 427; Dr. Crevaux in South America, 428 African Exploration, 428; Geographical Notes, 429; The Congo, 528; Lake Nyassa, 528; O'Neill's Journey in Makua Land, 529; Abyssinia, 530; Schuwer, 531; The new Polar Stations, 532; The Chukches and the Kuro-Sivo, 612; Geographical Notes, 612; African Exploration, 758; The Circumpolar Stations, 761; The Rescue of the Crew of the Eira, 838; African Exploration, 839; Deep-sea Explorations, 840; Ascent of Mount Cook, 840; Afghanistan, 840; De Brazza's Explorations on the Ogowe and the Congo, 928; Stearns' Expedition to Labrador, 930; Proceedings of the Geographical Section of the British Association, 1034; Pogge and Wissman, 1039; African Exploration, 1040.

Microscopy.—A hollow glass sphere as a condenser for microscopic illumination, 169; Arrestation of infusorial life, 170; The Acme microscopes, 261; American Society of Microscopists, 344; Bausch's homogeneous immersion objectives, 341; Lehigh Valley Microscopical Society, 347; Pigeon-post Films, 347; Blood stains on steel, 347; The new Trichinoscope, 429; Structure of the cotton fiber, 431; Practical microscopy, 432; Measurement of microscopic aperture, 532; A new journal, 533; Summer School of Biology, 533; Micro-chemistry, 614; Protector for Objectives, 618; Living Objects for the Microscope, 618; The August Meetings, 691; Eye Protectors, 691; An Adjustable Spring Clip, 692; Cereal foods under the Microscope, 692; Removal, 693; Microscopic Dexterity of the Cameo Cutters, 762; The Microscope in the Detection of Forgery, 763; Kent's Infusoria, 763; Bibliography of the Microscope, 841; Apparent size of magnified objects, 841; Double staining of nucleated Blood Corpuscles, 841; Mounting with black Background, 842; Microscopy at the American Association, 931; Martin's Unmounted Objects, 931; Taylor's Freezing Microtome, 1040; Relation of Aperture and Power, 1042; Visibility of Fine Rulings, 1042; Cutting Sections of Coal, 1043; The House-fly as a carrier of Contagion, 1044; Recent Microscopical Papers, 1044.

SCIENTIFIC NEWS, 85, 171, 261, 347, 433, 533, 618, 603, 764, 842, 931, 1045.

PROCEEDINGS OF SCIENTIFIC SOCIETIES, 87, 174, 263, 349, 437, 535, 621, 695, 843, 932, 1046.
